

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method of coating a plastic part, comprising:  
coating a primer paint onto a part made of a black colored plastic to form a primer paint coating;  
coating a color base paint comprising a first color pigment onto the primer paint coating to form a color base paint coating;  
coating a base paint comprising an effect pigment onto the color base paint coating to form a base paint coating; and  
coating a clear paint onto the base paint coating to form a clear paint coating,  
wherein the clear paint coating is a transparent coating and does not contain a color pigment,  
wherein the primer paint comprises a second color pigment having an L\* value of 80 or more in CIE colorimetric system L\*a\*b\*,  
wherein the primer paint comprises the second color pigment which is present in an amount ranging from an amount equal to or more than 0.03 wt% to an amount equal to or less than 1 wt% relative to a solid content of the primer paint,  
wherein a hiding power of the color base paint coating is 30  $\mu\text{m}$  or more, and  
wherein a film thickness X ( $\mu\text{m}$ ) of the primer paint coating is  $5 \mu\text{m} \leq X \leq 15 \mu\text{m}$ , and a film thickness Y ( $\mu\text{m}$ ) of the color base paint coating is  $-X+20 \leq Y \leq 20$  when the film thickness X ( $\mu\text{m}$ ) of the primer paint coating is  $5 \mu\text{m} \leq X \leq 10 \mu\text{m}$ , and  $10 \leq Y \leq -X+30$  when the film thickness X ( $\mu\text{m}$ ) of the primer paint coating is  $10 \mu\text{m} \leq X \leq 15 \mu\text{m}$ .
- 2-4. (Canceled)

5. (Currently amended) The method of coating a plastic part according to claim 1,  
wherein the second color pigment present in the primer paint comprises at least one color pigment selected from the group consisting of organic color pigments among quinophthalone family yellow pigments, isoindoline family yellow pigments and isoindolinone family yellow pigments.
6. (Previously Presented) The method of coating a plastic part according to claim 1,  
wherein the primer paint, the color base paint, the base paint and the clear paint are baked after coating in a wet on wet manner.
7. (Withdrawn) The method of coating a plastic part according to claim 1,  
wherein the primer paint is baked after coating, and then the color base paint, the base paint and the clear paint are baked after coating in a wet on wet manner.
8. (Withdrawn) The method of coating a plastic part according to claim 1,  
wherein the primer paint and the color base paint are baked after coating in a wet on wet manner, and then the base paint and the clear paint are baked after coating in a wet on wet manner.
9. (Previously Presented) The method of coating a plastic part according to claim 1,  
wherein a tone of a coating film formed by coating the primer paint, the color base paint, the base paint and the clear paint onto the plastic part has an L\* value of 80 or more in CIE colorimetric system L\*a\*b\* and a value of 10 or less in a formula of  $\sqrt{(a^*)^2 + (b^*)^2}$ .
